

CHRIS CAPIZZUTO

Yonkers, NY · chriscodes@gmail.com · [Github](#) · [Portfolio Link](#)

Web developer skilled in React, Next.js, and JavaScript, focused on building responsive, data-driven applications

EDUCATION

Baruch College (CUNY) — B.B.A. in Digital Marketing, 2018–2020

Codesmith — Attended Full-Stack Web Development Program, 2021

Focused on full-stack JavaScript (React, Node.js, Next.js) through intensive pair programming and team-based projects

TECHNICAL SKILLS

- Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
 - Frameworks/Libraries: React, Next.js, Node.js
 - Styling: Tailwind CSS, JSX
 - Tools: Git/GitHub, npm, VS Code, REST APIs, MongoDB, fly.io
-

PERSONAL PROJECTS [\[Portfolio\]](#)

Pokémon Prize Checker Game [\[PrizeChecker.io\]](#) — *React, Next.js, TypeScript, Tailwind CSS, API*

- Created a tool that allows users a fun way to practice “prize checking” in the Pokemon TCG by gamify-ing in a seamless interface that is fun and inviting with a built in rank system that allows the user to follow their progress..
- Contributor and collaborator with [limitlesstcg.com](#)
[\[Github\]](#)

Pokémon TCG Analyzer [\[Dragapultist\]](#) — *React, Next.js, TypeScript, Tailwind CSS, MongoDB*

- Created a database that never existed, solving a data utility problem for competitive Pokémon TCG players by giving practical value to their TCG Live export data
- Designed a responsive interface that lets users upload, visualize, and analyze game exports to uncover play patterns and performance trends, something players lack
[\[Github\]](#)

Fitness Calorie Tracker App [\[Elephit\]](#) — *React, Node.js, CSS3, API*

- *Addressed inefficiencies in MyFitnessPal’s manual tracking system by automating calorie and macronutrient adjustments based on progress*
- *Combined efficient mathematical modeling with React state management for seamless, data-driven feedback and reduced manual input, utilizing dynamic adjustments that other manual apps lack.*
[\[Github\]](#)

DraftKings Daily Fantasy Optimizer [\[KingMaker\]](#) — *Next.js, TypeScript, Tailwind CSS, API, Python*

- *Uses DraftKings NBA salary API data, calculates custom efficiency scores, and generates cost-optimized lineups*
 - *User-friendly and simple way to create a roster quickly without needing to be a stat master or expert.*
[\[Github\]](#)
-

ADDITIONAL EXPERIENCE

Chess Instructor & Mentor — Westchester/Bronx, New York

Awardee of the Andy Lerner Award for Excellence in Chess Education

- Taught critical thinking, logic, and strategy to students aged 9–12 in group and one-on-one settings
 - Developed structured lesson plans and adapted instruction to diverse learning styles
 - Strengthened communication and analytical reasoning skills applicable to collaborative software development
-

ADDITIONAL INFORMATION

- U.S. Citizen with authorization to work without sponsorship. Fluent in English and Spanish
- Built and deployed multiple full-stack and front-end web apps independently
- Interested in front-end engineering and full-stack software development
- Completed FreeCodeCamp Full Stack Development Certification (300+ hours)
